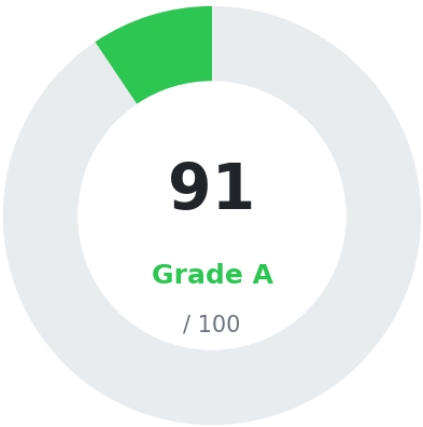
Data Quality Intelligence Report

Dataset: **sample_sales**

Generated: April 26, 2026 at 16:06

Overall Score



Overall Quality Score: 90.6/100
Excellent ■ | ■ Healthy

Shape: 15 rows × 8 columns | 4 numeric features

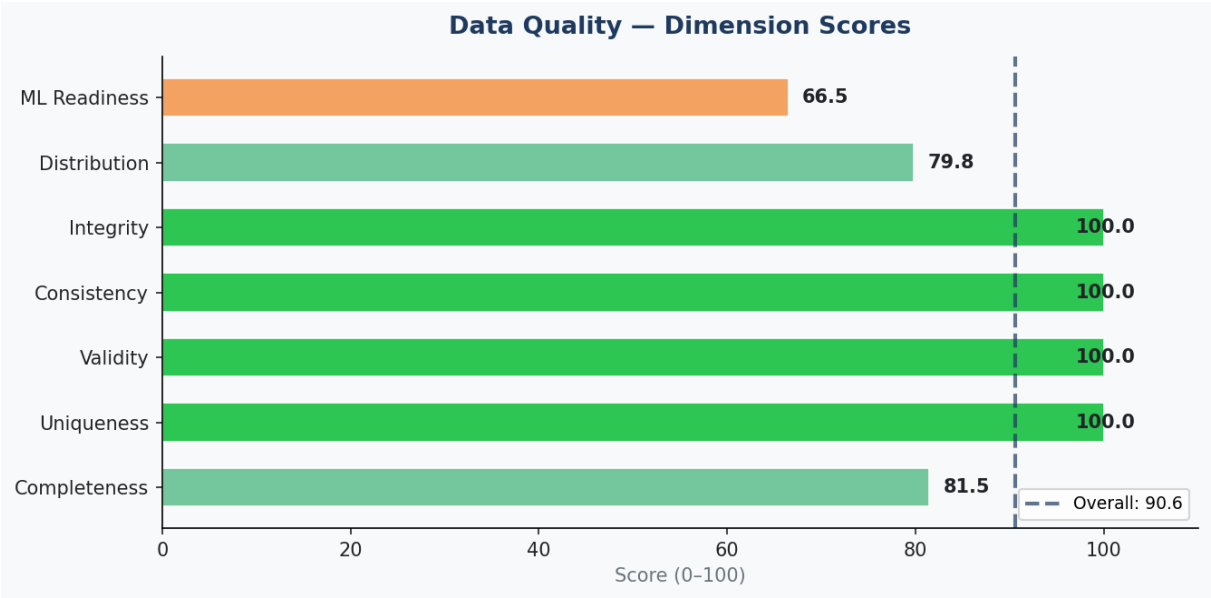
1. Executive Summary

This report presents a comprehensive data quality analysis of the dataset **sample_sales**, evaluated across 7 quality dimensions using the dataDoctor Quality Scoring Engine. The dataset contains **15 rows** and **8 columns**.

The overall quality score is **90.6/100** (Excellent ■). A total of **6 issues** were identified across all dimensions, alongside **19 positive indicators**.

■ Dataset quality is excellent. Ready for analysis and ML.

Dimension Scores Overview



2. Dimension Breakdown

Dimension	Score	Weight	Status	Issues
Completeness	81.5/100	22%	■ Good	1
Uniqueness	100.0/100	15%	■ Excellent	0
Validity	100.0/100	18%	■ Excellent	0
Consistency	100.0/100	15%	■ Excellent	0
Integrity	100.0/100	10%	■ Excellent	0
Distribution	79.8/100	10%	■ Good	4
ML Readiness	66.5/100	10%	■ Fair	1

2.1 Completeness — 81.5/100

Dataset is 96.7% complete at cell level ■

No column has >50% missing values ■

■ 4 column(s) with minor missing values (<10%)

2.2 Uniqueness — 100.0/100

No duplicate rows found ■

No constant (zero-variance) columns ■

All ID columns are 100% unique ■

2.3 Validity — 100.0/100

All named numeric columns within expected ranges ■

No impossible negative values found ■

String column formatting appears consistent ■

2.4 Consistency — 100.0/100

Date columns appear logically ordered ■

Min/Max column pairs are consistent ■

No dtype mismatches detected ■

2.5 Integrity — 100.0/100

No PII detected in column names or values ■

All column names are clean and well-formatted ■

Index integrity is clean ■

2.6 Distribution — 79.8/100

Categorical columns have good value diversity ■

- ■ **'quantity': moderate skewness (2.61)**
- ■ **'total': moderate skewness (1.51)**
- ■ **'quantity': 14.3% outlier rate (IQR)**
- ■ **'total': 20.0% outlier rate (IQR)**

2.7 ML Readiness — 66.5/100

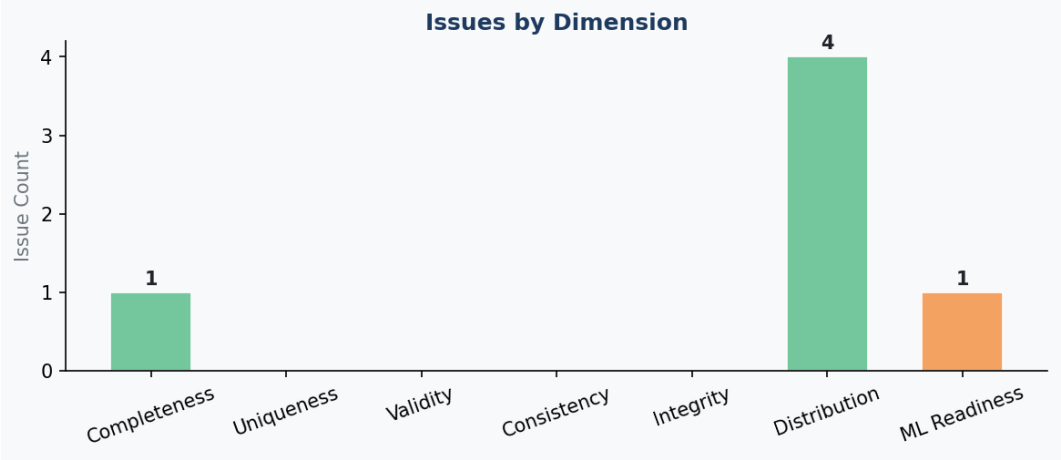
4 numeric features available ■

Numeric features are well-populated ■

Target 'category' is slightly imbalanced ■

- ■ **Only 15 rows — ML models need ≥100**

3. Issues & Recommendations



Prioritized Recommendations:

#	Recommendation
1	■ Dataset quality is excellent. Ready for analysis and ML.
2	■ ML: Only 15 rows — ML models need ≥100
3	■ Apply log/sqrt transform: 'quantity': moderate skewness (2.61)
4	■ Apply log/sqrt transform: 'total': moderate skewness (1.51)
5	■ Handle outliers: 'quantity': 14.3% outlier rate (IQR)
6	■ Handle outliers: 'total': 20.0% outlier rate (IQR)

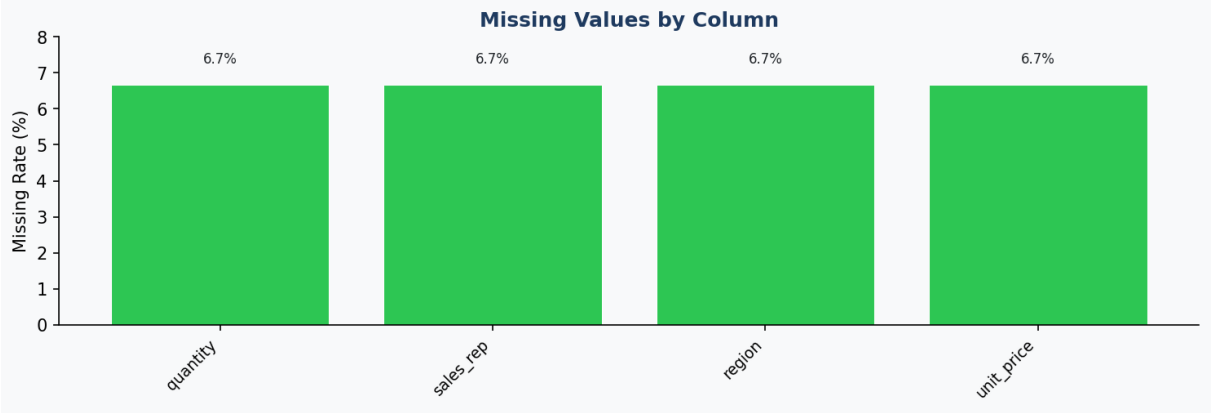
4. Dataset Statistics

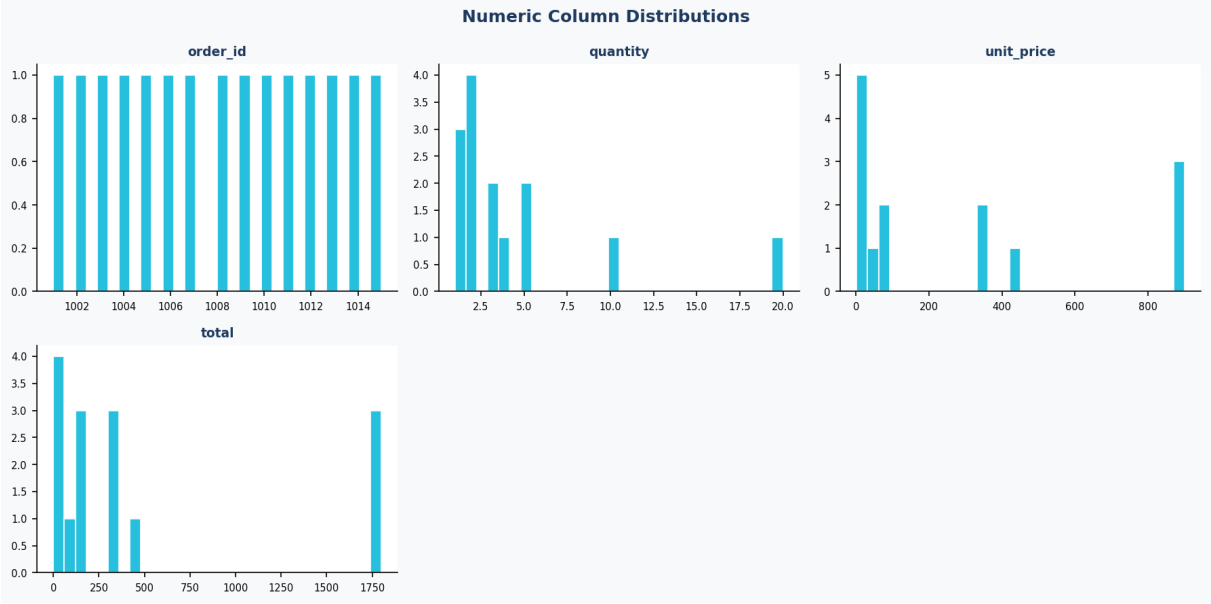
Metric	Value
Total Rows	15
Total Columns	8
Numeric Columns	4
Categorical Columns	4
Datetime Columns	0
Null Cells	4
Overall Null Rate	3.33%
Duplicate Rows	0
Memory Usage (MB)	0.002

Column Summary

Column	Dtype	Null %	Unique	Most Common
order_id	int64	0.0%	15	1001
product	str	0.0%	10	Laptop Pro
category	str	0.0%	3	Electronics
quantity	float64	6.7%	7	2.0
unit_price	float64	6.7%	10	899.99
total	float64	0.0%	10	1799.98
region	str	6.7%	4	North
sales_rep	str	6.7%	4	Alice

5. Missing Values Analysis





6. Numeric Distributions
